70mm Double Rebated
Flood Defence Composite Door

FLOOD DEFENCE COMPOSITE DOOR

Choosing a door for your home is a very important and difficult decision, particularly given the number of options available. You need to know you are choosing the right door for your home, a door that is as secure as it is stylish and that is designed to stand the test of time.

The 70mm Composite Door has been developed to the highest of standards, using the very best materials to ensure you get everything you are looking for and more;

Stunning Aesthetics

The 70mm Composite Door is available in various door styles and complete range of colours. Furthermore, there are 4 triple glazed laminated glass ranges to choose from to truly personalise your door. Adding in the low maintenance and durability that comes with choosing a GRP composite door makes The 70mm Composite Door a very appealing option.

Enhanced Security

The door leaf and glazing system are major components when part of a door set and have a proven ability to achieve PAS24:2012, industries enhanced security standard, a prerequisite in attaining certification to Secured by Design a police initiative to protect against unlawful intrusion.

Impressive Kerb Appeal

The woodgrain finish on a 70mm Composite Door is developed from oak tree grain, creating a beautiful authentic appearance. You'll find the same woodgrain effect, moulding design and exact colour match on the slim glazing cassette too, giving a seamless and elegant finish.

Superb Thermal Efficiency

When it comes to energy efficiency, the 70mm Composite Door is the best choice you can make, proven in independent testing to be substantially more thermally efficient than traditional timber doors and timber core composite doors. See page 4 for more information.

Ultimate Flood Defence

The 70mm Composite Door has an excellent weather seal thanks to its double rebate and the water resistant polymer composite rails protect its core. This means it won't suffer from water absorption which can lead to skin delamination and cause functional problems often associated with lower quality products. Your 70mm Composite Door will keep the weather at bay and will stay looking good for longer.

ENERGY EFFICIENCY

The 70mm Composite Door is more energy efficient than a traditional timber door or a solid timber core composite door – fact!

We all worry about how much energy our homes use. The rising cost of our energy bills and our impact on the environment mean we want to keep our consumption to a minimum. One of the best ways to do this is to choose thermally efficient products that keep warmth in and cold out, saving money and emissions.

When it comes to thermally efficient doors, The 70mm Composite Door is the best choice you can make.

Traditional timber panelled door

Solid timber core composite door

The 70mm Composite Door

Photographs show the thermal efficiency of each of the doors we tested. The darker the blue, the less heat is being lost. Reds and greens – the predominant colours on the timber door – indicates high heat loss.

SLEEP TIGHT

The 70mm Composite Door features a **double rebate**, is **57% thicker than a standard door** and has a **high density core** which not only makes your home energy efficient, but is also proven to reduce the impact of outdoor noise in your home.

Every 70mm Composite Door also features **50mm triple glazing** to further improve the acoustic insulation of your home.

GLASS OPTIONS

Your choice of decorative laminated glazing panels is the perfect finishing touch and a beautiful focal point.

We offer a range of four, laminated as standard glass designs, covering everything from the traditional to the contemporary. Each design perfectly complements our door styles and creates a stylish finish. All have slim sightlines to maximise light transmission and their frame uses the same moulding design and woodgrain effect as the rest of the door for a sophisticated and seamless finish.

Each glass is 50mm in thickness, that's more than double the thickness of our standard glass. All of the ranges are triple glazed, so the delicate decorative panel is encapsulated between two clear panes.

Kara
Decorative triple glazing featuring clear bevels and textured glass with brass or zinc coming.

Monza
Decorative triple glazing featuring grey bevels and textured glass.

Aspen
Decorative triple glazing featuring grey bevels and textured glass.

Edwardian

SOLID STYLES

Far from being just the safe choice, a solid door is the ultimate expression of confidence. Without decorative glazing to draw the eye you can focus on the beautiful wood-grain finish.

TRIPLE GLAZED AND LAMINATED

FOR EXTRA SECURITY

TECHNICAL INFORMATION

Construction

Every 70mm Composite Door is manufactured to the highest of standards to ensure it is strong, durable and secure.

The door has a perimeter sub-frame of a solid, water-resistant polymer material, which is reinforced with Laminated Veneered Lumber (LVL). A thermoset GRP skin is bonded to this sub-frame and the core of the door is then filled with high density, 100% CFC-free polyurethane foam. Finally, water resistant polymer composite rails protect the core from damage or water absorption.

The door's core is what makes it so thermally efficient and so good at reducing sound. In fact, as you can see from the images on page 4, it is the most thermally efficient door on the market, increasing your home's energy efficiency and saving you money on your energy bills.

The high impact resistant thermoset GRP skin not only keeps your door looking good, it will not expand and contract laterally so your door will not crack or delaminate. All standard solid colours are pre-pigmented and beautifully through-coloured. All other colours are over sprayed with a durable paint that will not peel or crack.

Technical figures

The 70mm Composite Door has a wealth of facts and figures that prove its quality. The door:

- achieves BS 6375-1 for weather tightness, air, wind and water
- reduces outdoor noise by an average of 31dB

- achieves Global Warming Potential (GWP) score of less than 5
- achieves Ozone Depletion Potential (ODP) score of zero
- meets UK Building Regulations U value requirements of 1.6 W/M2K

In other words, everything about a 70mm composite door has been designed to enhance your home for years to come.

Care and maintenance

Your 70mm Composite Door has been designed to be easy to maintain. To keep your door clean, prolong the life of the surface finish and protect your warranty, we recommend you wash it regularly using warm soapy water (washing up liquid is ideal) and a soft, lint-free cloth. If you live in a coastal area, in a heavily industrialised area or near a main road, you may need to clean your door more frequently.

It is important that you DO NOT use any of the following on your door:

- abrasive cleaners or scouring pads
- any type of bleach or solvent (e.g. white spirit, methylated spirit, cellulose thinners, acetone or nail varnish remover)
- any type of adhesives or tack for providing temporary protection or fixing of seasonal or other decorations
- high pressure or steam cleaners

Features & Benefits:

- 70mm Door System Profile
- Multi Point Locking System
- Bespoke Gasket Seal Arrangement
- TS007 3 Star Kitemarked Anti Snap Euro Cylinder
- Elongated Handle
- Door Furniture available in White, Chrome, Gold, Silver and Black
- 12-month manufacturer warranty – extended warranty subject to annual service
